

**ABSTRACT****PROVIDING A NODE OF A PEER-TO-PEER NETWORK WITH ACCESS  
TO A RESOURCE**

5

A method of providing a node 200 of a peer-to-peer network 250 with access to a resource 210 located within the network 250 comprising providing the node 200 with at least one link to the resource 210 which is  
10 actuatable to connect the node 200 to the resource 210 and the link having associated therewith information which provides an action that the node 200 accessing the resource 210 using the link should perform if the access should fail.
